Verkada | Epic Building Technologies

For **Healthcare**

One Platform to Simplify Healthcare Security

Improve security across healthcare facilities, while improving patient care and protecting privacy. Verkada is a fully integrated hardware and software solution that combines intelligent devices with an easy-to-use platform, enabling secure remote monitoring and faster incident response across departments.

Improve patient care

Maintain HIPAA compliance

Protect staff and patients

Key benefits

Preserve patient privacy

Safeguard PHI in respect to HIPAA compliance with granular role-based access, live-only viewing, face blur and Privacy Regions.

Restrict access with ease

Set door schedules around hours of operation, along with site and role-based access to privileged areas.

Protect staff with panic buttons

Easily view camera feeds associated with a button's location, call the police or initiate a lockdown with one press.

Leverage virtual guards

Keep patients safe around-the-clock and reduce false alarms with video-verified intrusion detection.

Improve patient satisfaction

Be alerted if hospital conditions — including noise and air quality — rise above or fall below certain thresholds.

Monitor from anywhere

Find, save, and share footage on-the-go. Plus, share live camera feeds with local authorities in seconds.

Epic Building Technologies and Verkada

Epic Building Technologies in Healthcare

Epic Building Technologies has the expertise to help healthcare organizations implement and execute physical security strategies.
