Verkada | Epic Building Technologies

For **Manufacturing**

One Platform to Simplify Industrial Security

From shipping and receiving docks to inventory storage and production areas, manufacturing facilities can be hotspots for theft and accidents. Verkada integrates intelligent hardware with an intuitive cloud-managed software platform to streamline security operations while ensuring safety and compliance.

Enhance workplace safety

Protect from liability claims

Maximize efficiency and minimize costs

Key benefits

Monitor from anywhere

Find, save and share footage on-the-go. Plus, share live camera feeds with local authorities in seconds.

Ensure EPA and OSHA compliance

Monitor for air quality, noise level, temperature and environmental conditions critical to worker health and safety.

Manage deliveries and inventory with ease

Process packages from a simple mobile app and integrate with video security for immediate visual verification.

Prevent access to restricted areas

Simplify access control with site and role-based permissions, SCIM integration and mobile door unlock.

Maximize productivity and mitigate risk

Monitor equipment health and activity across production areas. Receive SMS and email alerts for unusual events.

Automate after-hours response

Ensure after-hours security with professional monitoring and reduce false alarms with video-verified intrusion detection.

Epic Building Technologies and Verkada

Epic Building Technologies in Manufacturing

Epic Building Technologies has the expertise to help manufacturing organizations implement and execute physical security strategies.
